

AMENDMENTS TO THE SPECIFICATION

Please insert the following paragraph on page 10 immediately after the paragraph beginning with "Fig. 14 is":

Fig. 14A is a sectional view showing details of a spool according to a modification of the fourth embodiment of this invention.

Please replace paragraph [0057] with the following amended paragraph:

In this embodiment, the side member 15 of the first spool unit 11 is provided detachably in the short cylindrical unit 14. The side member 26 of the second spool unit 12 may also be provided detachably in the short cylindrical unit 25. For example, as shown in Fig. 14A, side member 26a can be detachably fitted into short cylindrical unit 25a. Also, though the side member 15 is screwed into the short cylindrical unit 14 to be fixed to the short cylindrical unit 14, the fixing structure is not limitative. For instance, by setting an outer diameter of the fitting cylinder 51 of the side member 15 and an inner diameter of the short cylindrical unit 14 to predetermined values, it is possible to reliably fix the side member 15 to the short cylindrical unit 14 only by fitting the fitting cylinder 51 into the short cylindrical unit 14.
